**TENANT NOTICE #1
SHORT RUNWAY REHAB**

TO: Airport Tenants

FM: Cynthia Stewart, Airport Manager 

RE: Runway 13L – 31R Rehabilitation Project – Activities and Closures

Following the earthquake, we found that Tenant Notices were an invaluable communications tool to keep tenants abreast of our facility closures, repair activities and planned progress. Consequently, we are using the same means to communicate notifications for our planned rehabilitation of General Aviation Runway 13L – 31R (the Short Runway).

The work scheduled for this runway includes placement of an asphalt overlay, installation of a stormwater subdrain system, runway end identifier lights (REILS), and lighted distance-to-go signs.

The contract has been awarded to Watson Asphalt Paving Co., Inc., who performed extensive pavement work at this airport following the earthquake earlier this year. The project is scheduled to take 75 calendar days and will necessitate full closure of the runway that entire time.

At this time, we anticipate work beginning on or about 5 September 2001. We recognize this closure will affect airport and tenant operations; however, the work is essential to providing quality facilities for you, our aviation customers.

Additional notices will be issued as the project progresses and we have more specifics. As before, the purpose of this notice is to provide you with as much advance information as possible; but PLEASE WATCH THE NOTAMS FOR CHANGING DETAILS.

If you have any questions, please feel free to contact me, or Mr. Tony Wasser, Capital Projects Coordinator, both at (206) 296-7380.

Thank you in advance for your patience during this improvement project.
